

# Data Center Services

## Secure a single source, vendor-neutral services program for your Data Center and get unified standards of performance across your enterprise.

Your Data Center is the heart of your IT enterprise. The configuration changes as the product mix grows every year. Before you know it, today's technology becomes tomorrow's legacy product. Maintech's Data Center Services cover all your needs, giving you a single source for ISS solutions, as well as a unified set of SLO/SLA performance standards to create a level playing field.

Our Data Center Services portfolio gives you a customized solution to meet your needs.

### Why Maintech

- > Over 30 years experience managing corporate enterprise server farms and network data storage
- > Vendor-neutral, meaning we support a number of platforms, in any combination – Wintel-, UNIX-, and Linux-based
- > We support hardware lines from HP, IBM, Dell, Sun, STK, Network Appliance, EMC (CLARiiON), and other popular products
- > 100% on-shore infrastructure
- > Concentrated intellectual and capital resources
- > Adaptable and nimble, with a top-down approach to service management
