

MAINTECH VANTAGE

Maintech Vantage is our fully managed monitoring platform, uniquely built for enterprise IT and data center operations.

From server racks to cooling towers, we provide 24x7 monitoring across infrastructure, cloud, and specialized systems, showing you exactly what's happening across your environment.

Complete Infrastructure Coverage

Live Operational Visibility

Full Deployment & Management

MAINTECH

Complete Coverage Without Blind Spots.

A single, real-time view of every system, device, and service.

Core Infrastructure

- Servers, storage, and network equipment, physical and virtual
- Real-time performance metrics and predictive failure detection
- AWS, Azure, Google Cloud, and Cisco Meraki

Specialized Systems

- NVIDIA GPU monitoring for AI and compute workloads
- Liquid cooling systems, leak detection, and environmental sensors
- PDUs, UPS battery backup, cooling towers, and dedicated AC units

Security & Compliance

- ISO 27001 certified, annually penetration tested
- AES encryption, TLS 1.2+, SNMPv3, SSO-only access
- Built for SOC 2, CMMC Level 2, and NIST requirements

Live Visual Mapping

Interactive service maps display live health status across rack layouts, branch sites, and application topology, allowing issues to be traced to source and assessed for impact.

End-to-End Operations

Deployed through a single lightweight virtual machine with outbound access only, followed by comprehensive configuration, tuning, and ongoing maintenance.

Why Maintech Vantage?

Maintech Vantage gives you one live view of your infrastructure, helping you spot issues faster. Maintech manages it for you, so there's less for your team to maintain.
